

# How a rec league can source verified fabrics for uniforms in hours, not weeks

Bolt&Barter's Uniform BOM workflow compresses sourcing uncertainty by combining structured yardage needs, dye-lot-aware filtering, verified YardCards, and \$1–\$3 swatch-first testing.

## Problem

Most league coordinators and team operators rely on fragmented notes, email screenshots, or generic supplier catalogs that do not preserve the exact width, dye lot, drape, or available yardage needed for repeatable uniform sourcing.

## What changes

- Uniform BOM template captures exact yardage and repeat needs.
- Pattern-Match widget filters to verified fabrics that match those constraints.
- YardCards expose width, fiber, drape, color, and dye-lot evidence up front.
- Swatch-first ordering reduces risk before a larger run.

**ACQUISITION WIDGET**

### Pattern-Match Fabric Finder embed

Publish a responsive widget on partner sites that filters verified Bolt&Barter fabrics by yardage, width, fiber, drape, color, and dye lot — then deep-links straight to swatch ordering.

The preset mix includes dressmaking, jacket/cosplay, and a sports-friendly Uniform BOM angle for RecTrack / TeamIO-style acquisition content.

**Security + operations notes**

- The widget is delivered as an iframe via a copy-paste script snippet.
- The public widget API only supports GET and OPTIONS and returns explicit CORS headers.
- Responses are rate-limited in-memory per IP window to reduce abuse.
- Script and API routes send restrictive security headers including X-Content-Type-Options and Content-Security-Policy.

---

**BOLT&BARTER**  
Verified deadstock, clear evidence, and calm policy language for every transaction.

## Operational benefit

Instead of waiting days for mismatched vendor replies, a league operator can compare pre-filtered, verified options in one place and immediately request swatches from promising lots.

## Best fit

- Rec leagues standardizing team kits
- School or club programs with repeat ordering cycles
- Operators who need BOM predictability and dye-lot clarity
